SUBJECT INDEX

N-acetoxyarylamines, detection using salmonella mutagenicity assay, **8**, 72
Acrolein, allyl alcohol and haemolysis, **8**, 159
Acrolein vapour, influence as a trace contaminant in 2-methoxy-3, 4-dihydro-2H-pyran, **8**, 229
Acrylamide neuropathy, improved recovery with ORG. 2766, **8**, 159
Actin polymerization, depolymerization and inhibition by organotin compounds in human polymorphonuclear leukocytes, **8**, 155
Adhesives, used in substance abuse, **8**, 264
Adrenal gland, effects of aminoglutethimide, **8**, 70
Adrenal medulla, rat, after exposure to high dietary levels of lactose or various polyols, **8**, 88
Adult respiratory distress syndrome, resulting from resin phenol-formaldehyde intoxication, **8**, 247
Age, related changes in mixed function oxidase, **8**, 158
Agent Orange, herbicide, effect on Vietnam veterans, **8**, 192
Alcohol, in relation to volatile substance abuse, **8**, 313
Alcohol metabolism, rate reduced by protein deficiency, **8**, 69
Aliphatic hydrocarbons, used in 'glue sniffing', **8**, 262
Alkylation damage, repair in DNA of hepatic and other tissues, **8**, 152
Allyl alcohol, acrolein and haemolysis, **8**, 159
Allylamine, inducing toxicity in chick MMR, effect of hydralazine, **8**, 161
Aluminium exposure, effect on hair, bone and plasma, **8**, 5
Aluminium hydroxide, associated with hyperaluminaemia, **8**, 45
Alveolar macrophages, dissolution, **8**, 111
2-Aminofluorene, activating capacity in human liver, **8**, 164
Aminoglutethimide, producing toxic alterations of the adrenal gland, **8**, 70
Ammonia, major aetiological agent in hepatic encephalopathy, **8**, 62
Analytical chemists, exposed to a TCDD standard, **8**, 193
Anoria, VSA-related death, **8**, 287
Aromatic hydrocarbon receptor, **8**, 185
Arsenic, inducing skin toxicity, **8**, 99
Arsenical poisoning, treatment by dimercaprol, **8**, 65
Asthmatics, results of treatment, **8**, 225
Astrocytes, normal response following damage in CNS, **8**, 147
Astrocytes, toxic effects of metabolic inhibitors, **8**, 62
ATP depletion, in hydrazine hepatotoxicity, **8**, 160
Axonal growth, effects of cytoskeletal neurotoxins, **8**, 146
Axonopathy, induced by ß, ß′-iminodipropionitrile, **8**, 154

Benzyl acetate, toxicity after systemic administration, **8**, 71
Biotransformation capacity, phase-1 and phase-11, effect of butylated hydroxyanisole, **8**, 451
Blood-brain barrier, studies, **8**, 222
Blood lead monitoring programme 1984–1987, results for 1986, **8**, 205
Bone, effects of aluminium exposure, **8**, 5
Bone marrow, effect of ranitidine, **8**, 19
Bowen's disease, arsenic induced, **8**, 100
Brain, effect of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine, **8**, 145
Brain α_2-adrenoceptors, interaction of formamidine pesticides, **8**, 162
Brain glutamic acid decarboxylase, inhibition by sodium 2-mercaptoethanesulphonate and endogenous thiols, **8**, 221
Brain metabolism, changes caused by toxic agents, **8**, 143
British Toxicology Society, Proceedings of the British Toxicology Society, Oxford, 22–23 September 1988, Joint British Toxicology Society, Institute of Biology Symposium: Ecotoxicology, **8**, 55
British Toxicology Society, Proceedings of the joint meeting with the Societa Italian di Tossicologia, Venice, Italy, 23–24 June, 1988, **8**, 141
British Toxicology Society, Proceedings of the British Toxicology Society, Cambridge, 12–14 March, 1989, joint British Toxicology Society and Society for Drug Research Symposium, **8**, 393
Bronchial asthma, effects of salbutamol and theophylline, **8**, 225
Bronchoconstriction, antigen-induced, **8**, 68
Butane, used in 'glue sniffing', **8**, 262
Butylated hydroxyanisole, effect on clinical parameters and phase-1 and 11 biotransformation capacity in man, **8**, 451
Butylglycol intoxication, a case report, **8**, 243
2-t-Butyl-4-methoxyphenol, free radical intermediates during oxidation, **8**, 163

Caecal enlargement, caused by poorly digestible carbohydrates, **8**, 87
Calcium entry blockers, effects on human platelet metabolism, **8**, 131
Calcium metabolism, effect of carbohydrates, **8**, 87
Canthaxanthin, electroretinographic and ophthalmological survey of patients, **8**, 439
Carbaryl metabolism, by rat skin and liver, **8**, 67
Carbohydrates, effect on calcium metabolism in rats, **8**, 87
Carbon monoxide intoxication, weather influence, **8**, 355
Carbon tetrachloride, poisoning, **8**, 284
—, reductively activated by enzymes of cytochrome P-450 group, **8**, 151
Cardiac arrhythmia, VSA-related death, **8**, 287
Cardiac toxicity, due to toluene, **8**, 303
—, from 1,1,1-trichloroethane and trichloroethylene abuse, **8**, 304
Carotene, electroretinographic and ophthalmological survey of patients, **8**, 439
Central nervous system, repair following MPTP, **8**, 154
—, repair mechanisms following toxic injury to glial cells, **8**, 147
Cerebellar disease, associated with volatile substance abuse, **8**, 293
Cerium, intracellular localization, **8**, 511
Chemical toxicity, for the Coroner, **8**, 375
Chemicals, risk assessment and control in food, **8**, 85

Chloracne, resulting from 2,3,7,8-TCDD, **8**, 190
Chlorinated solvents, used in 'glue sniffing', **8**, 262, 283
1-Chloro-2-hydroxypropane epoxidase, in rat liver and other organs, **8**, 163
Chloroquine phosphate, inducing haematemesis, **8**, 387
Cholinesterases, inhibition of, correlation with malathion insect spray, **8**, 11
Chronic encephalopathy, associated with volatile substance abuse, **8**, 293
Cinnamyl anthranilate, withdrawal due to murine hepatocarcinogenicity, **8**, 70
Ciprofibrate, producing liver tumours in rats and mice, **8**, 60
Ciprofibrate, effect on hepatic lipid metabolism, **8**, 64
Comfrey, and liver damage, **8**, 68
Contamination, of food, with residues from chemicals and veterinary pharmaceuticals, **8**, 58
Control of Substances Hazardous to Health Regulations, 8, 274
Coroner, chemical toxicity, **8**, 375
Cotinine, effect on production of oxygen free radicals by neutrophils, **8**, 461
Coumarin, causing liver damage, **8**, 61
Coumarin, liver toxicity, **8**, 501
Creatinuria, resulting from testicular toxins, **8**, 66
Cyanosis, caused by dinitrobenzene, **8**, 66
Cyclosporin A, inducing liver injury, **8**, 155
Cytochrome P–450, variations in functional expression in Caucasian and ethnic groups, **8**, 39
Cytopenias, result of ranitidine, **8**, 19
Cytoskeletal neurotoxins, effect of axonal growth, **8**, 146

Debrisoquine, non-correlation with metoprolol polymorphisms in the venda, **8**, 365
—, query use as measure of oxidative status in any group other than Caucasians, **8**, 39
Dementia, associated with volatile substance abuse, **8**, 293
Dichloro(2-chlorovinyl)arsine, damage to rabbit tissues, **8**, 64
Dichlorodifluoromethane, used in 'glue sniffing', **8**, 262
Dieldrin, effect on rat tissues, **8**, 73
Di(2-ethylhexyl)phthalate, effect on rat tissues, **8**, 73
Dihydrocoumarin, causing liver damage, **8**, 61
Diltiazem, effect on platelet metabolism, **8**, 131
Diltiazem overdose, pharmacokinetics and toxic effects, **8**, 497
Dimercaprol, effect on rabbit tissues, **8**, 64
—, treatment of poisoning by arsenicals, **8**, 65
2,3-dimercapto-1-propanesulphonic acid, effect on rabbit tissues, **8**, 64
Dimethylnitrosamine demethylase activity, **8**, 164
Dimethyl sulphoxide, used in skin absorption of benzyl acetate, **8**, 72
Dinitrobenzene, damage to brain stem regions, **8**, 143
—, effect on urinary creatine levels, **8**, 66
Dioxins, background sources of exposure, **8**, 194
Dissolution, of uranium tetrafluoride, **8**, 111
DNA, of hepatic tissues, repair of alkylation damage, **8**, 152
Drug education, concerning volatile substance abuse, **8**, 331
Drugs, illicit, in relation to volatile substance abuse, **8**, 313

Education, and volatile substance abuse, **8**, 331
Electroretinographic survey, of patients taking canthaxanthin and carotene, **8**, 439
Endogenous thiols, inhibiting brain glutamic acid decarboxylase, **8**, 221
Environment, providing possible routes of exposure to radiation, **8**, 80
Environmental sources of lead, **8**, 213
Epidemiology and clinical data, of self-poisoned patients, **8**, 475
Ethanol, pharmacokinetic interaction with indoramin, **8**, 237
—, used in skin absorption of benzyl acetate, **8**, 71
—, used in treatment of methanol poisoning, **8**, 135
Etomidate, effect on adrenal gland, **8**, 70

Fibrosis, lungs protected by total exclusion from external respiration, **8**, 465
Fish, effect of pyrethroids, **8**, 58
Flour, contaminated, causing lead poisoning, **8**, 385
Flunarizine, effect on platelet metabolism, **8**, 131
Food, contaminated with residues from chemicals and veterinary pharmaceuticals, **8**, 58
—, effect of radionuclides, **8**, 79
Food colours, adverse reactions, **8**, 61
Formamidine pesticides, interaction with brain α_2-adrenoceptors, **8**, 162
Free erythrocyte protoporphyrin, comparison of responses in male and females after same degree of lead exposure, **8**, 105

Galactosyltransferase activity, after incubation with various hahnemannian dilutions of $HgCl_2$, **8**, 128
Ganglioside treatment, effect on ß, ß′-iminodipropionitrile-induced axonopathy, **8**, 154
Gastric alkalinization, causing hypergastrinaemia, **8**, 63
Gastrin, major role in neuroendocrine cell hyperplasia, **8**, 63
Glial cells, toxic injury resulting in repair mechanisms in the CNS, **8**, 147
Glomerulonephritis, linked to toluene, **8**, 303
Glucose, in cerebral metabolism, **8**, 143
Glucose-6-phosphatase activity, after incubation with various hahnemannian dilutions of molybdate, and citrate, **8**, 127
Glutathione, mediated, mechanisms of defence, **8**, 152
GM1, induced repair of the central nervous system following MPTP, **8**, 154
Gossypol, effect on human sperm motility, **8**, 49

Haematemesis, caused by chloroquine phosphate, **8**, 387
Haematological alterations, lead-induced, **8**, 105
Halothane, reductively activated by enzyme of cytochrome P-450 group, **8**, 151
Hepatic bilirubin transport, experimental studies, **8**, 155
Hepatic drug metabolism, effects of theophylline and salbutamol, **8**, 225
Hepatic encephalopathy, effect of metabolic inhibitors, **8**, 62
Hepatic failure, from phenolphthalein poisoning, **8**, 381
Hepatic haem metabolism, disturbances caused by 1,1,2,2-tetrachloroethane, **8**, 157

Hepatic lipid metabolism, following administration of ciprofibrate, **8**, 64
Hepatic peroxisome proliferation, resulting in liver tumours in rats and mice, **8**, 60
Hepatocytes, NMR studies of hydrazine hepatoxicity, **8**, 156
Hepatorenal damage, in patients poisoned with carbon tetrachloride, **8**, 285
Hepatotoxicity, caused by coumarin, **8**, 61
—, glutathione-mediated mechanisms of defence, **8**, 152
—, triphenyl tin in rats, **8**, 157
Herbicide, Agent Orange, effect on Vietnam veterans, **8**, 192
Heroin overdose, toxicological data, **8**, 487
Hexachlorobenzene, causing liver damage, **8**, 149
—, inducing porphyria, **8**, 162
n-Hexane, causing peripheral neuropathy, **8**, 294
Hemeopathic dilutions, effect on subcelluylar enzymes, **8**, 125
Human health, risks from polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans, **8**, 173
Hydralazine, effect on toxicity in chick myocardial myocyte reaggregate cultures, **8**, 161
Hydrazine hepatotoxicity, role of ATP depletion, **8**, 160
—, studies, in isolated hepatocytes, **8**, 156
Hyperaluminaemia, associated with oral citrate and aluminium hydroxide, **8**, 45
Hypergnstrinaemia, resulting from gastric alkalinization, **8**, 63
Hyperkeratoses, arsenic induced, **8**, 100
Hyperpigmentation, caused by chronic arsenic toxicity, **8**, 100
Hyponatraemia, during oxcarbazepine therapy, **8**, 337

ß, ß'–Iminodipropionitrile-induced axonopathy, effect of ganglioside treatment, **8**, 154
Immunogenicity, to synthetic food colours, **8**, 61
Immunotherapy, for treatment of paraquat poisoning, **8**, 121
Immunotoxicity of tri-n-butyltin, in rats, **8**, 74
Indoramin, pharmacokinetic interaction with ethanol, **8**, 237
Inhalation, of acrolein vapour, **8**, 229
—, used as a route of exposure, **8**, 68
Insecticides, effects on wildlife, **8**, 57
Intolerance, to synthetic food colours, **8**, 61
Iron overload, role on hepatic mitochrondrial porphyrin level in porphyria, **8**, 162

Ketoconazole, effect on adrenal gland, **8**, 70

Lactose, effect on calcium metabolism in rats, **8**, 87
Laxation, caused by rapid increase in dietary intake of a polyol, **8**, 95
Lead, in blood, monitoring programme, **8**, 205
—, inducing haematological alterations, **8**, 105
—, poisoning from contaminated flour, **8**, 385
Legislation, regarding volatile substance abuse, **8**, 329
Lewisite, damage to rabbit tissues, **8**, 64
Lignocaine poisoning, review of literature, **8**, 389
Lipid peroxidation, and 2,3,7, 8-TCDD, **8**, 187
—, participation in loss of hepatic drug-metabolizing capacity in the rat, **8**, 161
—, role of toxic carbonyls, **8**, 149
Liver, capacity to metabolize carcinogens, **8**, 164
—, effect of Coumarin, **8**, 501
—, effect of DEHP, **8**, 73
—, effect of paraquat after immunotherapy, **8**, 122
Liver, rat, study of carbaryl metabolism, **8**, 67
Liver cytochrome P-450, inactivation by polyhalogenated chemicals, **8**, 151
Liver damage, caused by comfrey, **8**, 68
—, by polyhalogenated aromatic chemicals, **8**, 149
—, studies on hepatic bilirubin transport, **8**, 155
Liver mixed function oxidase, effect of 3-methylcholanthrene induction and age, **8**, 158
Liver porphyrin metabolism, changes after exposure to TCDD, **8**, 190
Liver toxicity, free radical, **8**, 149
Liver tumours, caused by chemicals, **8**, 60
Lungs, dissolution of uranium tetrafluoride, **8**, 111
Lungs, protected from development of fibrosis after paraquat poisoning by total exclusion from external respiration, **8**, 465

Major hazards, assessment of toxicity, **8**, 369
Malathion insect spray, evaluation of poisoning, **8**, 11
Malnutrition, can be associated with high alcohol consumption, **8**, 69
Marine pollution, monitored using molecular, cellular and physiological responses of the common mussel, **8**, 59
Mesna, inhibits glutamic acid decarboxylase activity *in vitro*, **8**, 224
Meso-2,3-dimercaptosuccinic acid, effect on rabbit tissues, **8**, 64
Metabolic effects, of calcium entry blockers on human platelets, **8**, 131
Metabolic stress, from uptake of neurotoxins, 8, 143
Metabolism, brain, changes caused by toxic agents, **8**, 143
Methaemoglobin production, and reduction by methylene blue, **8**, 359
Methanol intoxication, 8, 135
2-Methoxy-3,4-dihydro-2H-pyran, influence of acrolein vapour, **8**, 229
3-Methylcholanthrene, effect on liver mixed function oxidase system, **8**, 158
Methyl n-butyl ketone, causing peripheral neuropathy, **8**, 294
Methylene blue, altering production and reduction of methaemoglobin, **8**, 359
—, interaction with sodium nitrite *in vivo*, **8**, 359
1-Methyl-4-phenylpyridinium, 8, 145
1-Methyl-4-phenyl-1,2,3,6-tetrhydropyridine, effect on the brain, **8**, 145
—, preceeding GM1 induced repair of the CNS, **8**, 154
Metropolol oxidation, in San Bushmen, **8**, 39
Metroprolol polymorphisms, non-correlation with debrisoquine in the venda, **8**, 365
Metyrapone, effect on adrenal gland, **8**, 70
Microanalysis, intracellular localization of cerium, **8**, 511
Microcalorimetry, measuring effects of calcium entry blockers on human platelet metabolism, **8**, 131
Missouri waste oil contamination, exposed population studies, **8**, 193
Mitoxana, **8**, 221
Monitoring, of lead in blood, **8**, 205

Mortality, from volatile substance abuse, **8**, 265
Mortality and morbidity, in humans exposed to PCDDs and PCDFs, **8**, 188
Mussels, used in monitoring marine pollution, **8**, 59
Myelin sheath, vacuolation, **8**, 147
Myocardial myocyte reaggregate, effect of hydralazine, **8**, 161

NADPH-cytochrome c reductase activity, after incubation with various hahnemannian dilutions of $HgCl_2$, and phosphorus, **8**, 127
Neuroendocrine cell hyperplasia, following alkalinization and pentagastrin, **8**, 63
Neurological disorders, associated with exposure to volatile substances, **8**, 293
Neuropathy target esterase, in hen sciatic nerve, **8**, 164
Neuropsychological effects, of volatile substance abuse, **8**, 307
Neutrophils, production of oxygen free radicals affected by nicotine and cotinine, **8**, 461
Nicotine, effect on production of oxygen free radicals by neutrophils, **8**, 461
Nifedipine, effect on platelet metabolism, **8**, 131
Nitroalkanes, comparison of the hepatotoxic and genotoxic potential, **8**, 73
2-nitropropane, compared with nitromethane and nitroethane, **8**, 73
Nitrosopyrrolidine, activating capacity in human liver, **8**, 164
NMR urinalysis, used to monitor disease process of renal failure after absorption of phenol, **8**, 491
Nutrition, influence on ^{239}Np and ^{233}Pa retention, **8**, 425

Oligodendrocytes, **8**, 147
Omeprazole, causing neuroendocrine cell hyperplasia in rat, **8**, 63
Ophthalmological survey, of patients taking canthaxanthin and carotene, **8**, 439
ORG.2766, improves recovery from acrylamide neuropathy, **8**, 159
Organic solvents, 'end use', **8**, 273
—, exposure and control, **8**, 272
—, usage, **8**, 271
Organochlorine insecticides, toxic effects on the sparrowhawk, **8**, 57
Organophoshate, induced polyneuropathy, **8**, 144
Organophosphorus and carbamate insecticides, effects when applied to field crops, **8**, 57
Organotin compounds, affecting human polymorphonuclear leukocytes, **8**, 155
Oxcarbazepine therapy, causing hyponatraemia, **8**, 337
Oxidative metabolism, inter-individual differences, **8**, 39
Oxygen free radicals, production affected by nicotine and cotinine, **8**, 461

Paraphenylenediamine, inducing rhabdomyolysis and acute renal failure, **8**, 345
Paraquat, immunotherapy for treatment of poisoning, **8**, 121
—, lungs protected from development of fibrosis by total exclusion from external respiration, **8**, 465
—, new method for predicting outcome and survival period after poisoning, **8**, 33
—, through skin absorption, clinical and laboratory observations, **8**, 483
Parkinson's disease, linked to MPTP, **8**, 145
Penachlorophenol, results of exposure to humans, **8**, 188
Pentachlorophenol, effect on astrocytes, **8**, 62
Pentagastrin, inducing neuroendocrine cell hyperplasia, **8**, 63
Peripheral blood lymphocytes, human, cytotoxic effects of trimethyltin chloride, **8**, 349
Peripheral neuropathy, associated with toluene, **8**, 295
—, associated with volatile substance abuse, **8**, 293
Pesticides, and biological activity in soils, **8**, 59
Petrol, effect on blood lead of reduction in petrol lead, **8**, 215
Pharmacokinetics, oral and dermal, of triclopyr, **8**, 431
Phalloidin, inducing liver injury, **8**, 155
Phenol, causing acute renal failure, **8**, 491
Phenolphthalein poisoning, with hepatic failure and disseminated intravascular coagulation, **8**, 381
Phenylethanol, used in skin absorption of benzyl acetate, **8**, 72
Plasma, effect of aluminium exposure, **8**, 5
Platelet metabolism, effect of calcium entry blockers, **8**, 131
Polychlorinated dibenzo-p-dioxins, risks to human health, **8**, 173
Polychlorinated dibenzofurans, risks to human health, **8**, 173
Polyhalogenated aromatic chemicals, causing liver injury, **8**, 149, 151
Polymorphonuclear leukocytes, human, affected by organotin compounds, **8**, 155
Polyneuropathy, induced by organophosphate, **8**, 144
Polyols, effect on calcium metabolism in rats, **8**, 87
Porphyria, role of iron overload on the hepatic mitochrondrial porphyrin level, **8**, 162
Proceedings of the joint meeting of the Societa Italiana di Tossicologia and the British Toxicology Society, Venice, Italy, 23–24 June, 1988, **8**, 141
Propane, used in 'glue sniffing', **8**, 262
Protein, intake on the absorption of calcium, **8**, 90
Protein deficiency, leading to reduced rate of alcohol metabolism, **8**, 69
Proteinuria, resulting from resin phenolformaldehyde, **8**, 247
Psychosocial perspectives, of volatile substance abuse in relation to alcohol and illicit drugs, **8**, 313
Pulmonary toxicity, due to toluene, **8**, 303
Pyrethroids, effect on fish, **8**, 58

Radionuclides, in food, **8**, 79
Ranitidine, and haemopoiesis in culture, **8**, 19
—, in beagles, seven year safety evaluation, **8**, 23
Regional disturbances of brain metabolism, brought about by toxic agents, **8**, 143
Renal failure, following cutaneous absorption of phenol, **8**, 491
—, induced by paraphenylenediamine, **8**, 345
—, resulting from resin phenolformaldehyde, **8**, 247
Renal retention, of uranium after dose of UF_4, **8**, 114
Renal tubular acidosis, caused by toluene abuse, **8**, 302
Resin phenol-formaldehyde, a life threatening occupational hazard, **8**, 247

Respiratory depression, VSA-related death, **8**, 287
Retinamide teratogenicity, comparison of effects, **8**, 62
Rhabdomyolysis, induced by paraphenylenediamine, **8**, 345
Rotenone, effect on astrocytes, **8**, 62

Salbutamol, effect on hepatic drug metabolism, **8**, 225
Salmonella, effect in detection of N-acetoxyarylamines, **8**, 72
Scalp hair, as an indicator of aluminium exposure, **8**, 5
Sciatic nerve, contains a form of neuropathy target esterase, **8**, 164
Self-poisoned patients, epidemiology and clinical data, **8**, 475
Self-poisoning, choice of agents, **8**, 507
Seveso accident, exposed population studies, **8**, 190
Skin, absorption of benzyl acetate, **8**, 71
—, absorption of paraquat, clinical and laboratory observations, **8**, 483
—, rat, study of carbaryl changes, **8**, 67
—, toxicity caused by arsenic, **8**, 99
Sodium 2-mercaptoethanesulphonate, inhibition of brain glutamic acid decarboxylase, **8**, 221
Sodium nitrite, interaction with methylene blue, **8**, 359
Sodium pentachlorophenate, results of exposure to humans, **8**, 188
Soil, biological activity and effect of pesticides, **8**, 59
Solvent exposure, characteristics, **8**, 272
Sorbitol, and calcium absorption, **8**, 92
Sparrowhawk, effect of organochlorine insecticides, **8**, 57
Sperm motility, effect of gossypol, **8**, 49
Sir Lanka, self poisoning choice of agents, **8**, 507
Subcellular enzymes, effect of homeopathic dilutions, **8**, 125
Sugars, polyols and calcium, in rat and man, **8**, 87

2,3,7,8-TCDD, a non-genotoxic carcinogen, **8**, 178
TCDD exposure, linked to interference with liver porphyrin metabolism, **8**, 190
1,2,4,5-Tetrachlorobenzene, effect on humans, **8**, 188
2,3,7,8-Tetrachlorodibenzo-p-dioxin, causing liver damage, **8**, 149
1,1,1,2-Tetrachloroethane, genotoxicity, **8**, 158
1,1,2,2-Tetrachloroethane, causing lipid peroxidation and disturbances in hepatic haem metabolism in mice, **8**, 157
Theophylline, effect on hepatic drug metabolism, **8**, 225
Thyroid, effect of DEHP, **8**, 73
Tin, presence in liver and kidney after tri-n-butyltin administration, **8**, 74
Toluene, causing peripheral neuropathy, **8**, 295
—, causing renal and hepatic toxicity, **8**, 302
—, used in 'glue sniffing', **8**, 262, 280
Toxic agents, causing disturbances of brain metabolism, **8**, 143
Toxicity for major hazards, assessment, some concepts and problems, **8**, 369
Toxicological analyses, role in detecting exposure to volatile substances, **8**, 279
Toxic rice oil, exposed population studies, **8**, 194
Transformer oil, exposure of maintenance workers and exposure after fires, **8**, 194
Trichloroethylene, causing liver damage by VSA, **8**, 304
1,1,1-trichloroethane, laboratory findings after poisoning, **8**, 283
Trichlorofluoromethane, used in 'glue sniffing', **8**, 262
Trichlorphenol, investigation into mortality of workers at DOW Chemicals, **8**, 188
Triclopyr, oral and dermal pharmacokinetics, **8**, 431
Trimethyltin chloride, cytotoxic effects on human peripheral blood lymphocytes *in vitro*, **8**, 349
Tri-n-butyltin, immunotoxicity in rats, **8**, 74
Triphenyl tin hepatotoxicity, morphological and biochemical aspects, **8**, 157

Uranium tetrafluoride, lung dissolution, **8**, 111
Urinary excretion, of uranium after dose of UF_4, **8**, 114

Vagal inhibition, VSA-related death, **8**, 287
Verapamil, effect on platelet metabolism, **8**, 131
Vitamin A metabolism, altered by 2,3,7,8-TCDD, **8**, 187
Volatile compounds, maximum possible vapour concentration, **8**, 267
Volatile substance abuse, causing damage to heart, liver, kidney and lung, **8**, 301
—, causing neurological disorders, **8**, 293
—, detection, **8**, 266
—, evaluation and treatment, **8**, 319
—, Government, trade and industry and other preventative responses, **8**, 327
—, in relation to alcohol and illicit drugs, **8**, 313
—, legislation in the UK, **8**, 268
—, mechanism of sudden death, **8**, 287
—, neuropsychological consequences, **8**, 307
—, non-neurological toxicity, **8**, 301
—, an overview, **8**, 261
—, role of agencies in prevention and counselling, **8**, 323
—, within a health education context, **8**, 331
Volatile substances, diagnosis and treatment of poisoning, **8**, 277
—, use and abuse in industry, **8**, 271
—, which may be abused by inhalation, and their principal sources, **8**, 278

Weather influence, on prevalence of carbon monoxide intoxications, **8**, 355

Xylitol, and urinary excretion, **8**, 93
